<b>List of Tables</b>	<b>xv</b>
<b>List of Figures</b>	<b>xix</b>
<b>Major Findings and Preliminary Implications of the Everglades Interim Report</b>	<b>1</b>
<b>Summary of the Everglades Interim Report</b>	<b>11</b>
<b>Chapter 1: Introduction to the Everglades Interim Report</b>	<b>1-1</b>
The Geographic Setting.....	1-1
Governmental Setting: the District, Other Agencies and the Everglades Program .....	1-6
Regional Environmental Issues.....	1-8
Stormwater Treatment Areas .....	1-9
Objectives and Content of the Interim Report .....	1-10
Other Legal and Reporting Requirements.....	1-11
Layout and Format of the Interim Report .....	1-12
Process Used to Develop the Report.....	1-13
Constraints on Chapter Content and Interpretation.....	1-13
Report Organization .....	1-14
Peer Review of the Everglades Interim Report.....	1-15
Literature Cited .....	1-18
Acronyms Used in the Everglades Interim Report .....	1-21
Units of Measurement in the Everglades Interim Report.....	1-23
Glossary of Technical Terms in the Everglades Interim Report.....	1-24
<b>Chapter 2: Hydrologic Needs: The Effects of Altered Hydrology on the Everglades</b>	<b>2-1</b>
Summary .....	2-1
Introduction .....	2-4
Historic Hydrologic Change .....	2-5
Ecological Effects of Altered Hydrology.....	2-22
Benefits and Impacts of the Hydropattern Restoration Components of the Everglades Construction Project	2-40

Information and Techniques for Hydrologic Management.....	2-41
Information Gaps and Future Research Needs.....	2-53
Findings on Hydrological Needs.....	2-55
Literature Cited .....	2-56
<b>Chapter 3: Ecological Needs of the Everglades</b>	<b>3-1</b>
Summary .....	3-1
Introduction .....	3-5
Reference Conditions of the Ecosystem .....	3-6
Patterns of P Enrichment in the Marsh .....	3-19
Ecological Responses to P Enrichment.....	3-29
Modeling to Understand and Predict the Ecological Effects of P Enrichment .....	3-46
Current Understanding, Critical Knowledge Gaps and Future Research Needs .....	3-52
Findings on Ecological Needs.....	3-54
Literature Cited .....	3-55
<b>Chapter 4: Status of Compliance with Water Quality Criteria in the Everglades Protection Area and Tributary Waters</b>	<b>4-1</b>
Summary .....	4-1
Introduction .....	4-4
Analysis of Water Quality in the Everglades Protection Area.....	4-24
Temporal and Spatial Changes of Constituents with Excursions from Class III Criteria.....	4-34
Nutrient Inputs to Florida Bay from the Park .....	4-82
Spatial and Temporal Trends of Trace Metals in the EPA .....	4-84
Pesticide Monitoring in the EPA.....	4-106
Water Quality Status and Anticipated Improvements.....	4-114
Recommendations for Modifying Class III Criteria .....	4-120
Findings on Water Quality in the Everglades Protection Area .....	4-128
Literature Cited .....	4-129
<b>Chapter 5: Effectiveness of Best Management Practices</b>	<b>5-1</b>
Summary .....	5-1
Background .....	5-2
Study Approach.....	5-3
BMP Initiatives .....	5-6
Relationship of BMP Initiatives to Trends in Basin TP Load and Concentration Data .....	5-25
Other Water Quality Parameters of Concern .....	5-26
New BMP Initiatives and Recommendations .....	5-26
Conclusions .....	5-27
Costs Associated with BMP Research .....	5-28
Findings on the Effectiveness of Agricultural BMPs .....	5-28
Literature Cited .....	5-30

**Chapter 6: Effectiveness and Optimization of Stormwater Treatment Areas for Phosphorus Removal 6-1**

Summary ..... 6-1

Background and Issues..... 6-3

Everglades Nutrient Removal Project..... 6-8

Test Cell Research..... 6-25

Analysis of Data from Other Wetlands ..... 6-27

Wetland Water Quality Model..... 6-32

Status of Operating Stormwater Treatment Areas ..... 6-37

Potential Impacts on STA Performance ..... 6-39

Cost of Stormwater Treatment Area Optimization Research and Monitoring ..... 6-41

Findings on the Effectiveness of STAs..... 6-41

Literature Cited ..... 6-42

**Chapter 7: The Everglades Mercury Problem 7-1**

Summary ..... 7-1

Introduction ..... 7-3

The Mercury Cycle ..... 7-13

What is the Significance of the Everglades Mercury Problem? ..... 7-26

Can the Sources of Everglades Mercury be Adequately Controlled?..... 7-28

Can Management of Water Quantity and Quality Reduce Mercury Risks? ..... 7-31

How Will the Everglades Construction Project Affect Mercury Risks?..... 7-35

What is the Status of District and DEP Efforts to Understand and Solve the Mercury Problem?7-50

Conclusions ..... 7-54

Recommendations ..... 7-57

Findings on the Everglades Mercury Problem..... 7-57

Literature Cited ..... 7-58

**Chapter 8: Supplemental Technologies for Treating Stormwater Discharges into the Everglades Protection Area 8-1**

Summary ..... 8-1

The Act Requirements for Supplemental Technologies ..... 8-2

Impacts of the Section 404 Permit ..... 8-4

Integration of Research Findings on Supplemental Technologies with BMPs and STA Optimization to Achieve Final Water Quality Standards..... 8-5

Supplemental Technologies Under Investigation ..... 8-5

Evaluation and Comparison of Supplemental Technologies ..... 8-15

Application of the Standard of Comparison..... 8-15

Scheduling and STA-3/4 Design..... 8-16

Develop Integrated Water Quality Plan (BMPs, STAs, Supplemental Technologies).. 8-16

Selection and Implementation of Phase II Technologies ..... 8-18

Research, Development and Implementation Costs ..... 8-18

Findings on Supplemental Technologies .....	8-19
Literature Cited .....	8-20
<b>Chapter 9: Lower East Coast Regional Water Supply Plan</b>	<b>9-1</b>
Summary .....	9-1
Introduction .....	9-1
Identifying Environmental Water Demand in the LEC Planning Process .....	9-2
Implementing an Interim LEC Plan Before the Restudy is Concluded .....	9-4
The Final LEC Plan: Addressing the Regulatory Issues .....	9-6
Findings on the Lower East Coast Water Supply Plan .....	9-8
<b>Chapter 10: The C&amp;SF Restudy</b>	<b>10-1</b>
Summary .....	10-1
Introduction .....	10-2
Authorization of the C&SF Restudy .....	10-3
Purpose, Coverage and Scope of the C&SF Restudy .....	10-4
Characteristics of the Pre-project South Florida Ecosystem .....	10-5
History of the C&SF Project .....	10-6
Effect of the C&SF Project on the Natural System .....	10-7
The Restudy Planning Process .....	10-7
Goals and Objectives for the C&SF Restudy .....	10-8
The Existing and Future Without Project Conditions .....	10-8
Formulation and Evaluation of Alternative Project Plans .....	10-9
Alternative Development and Evaluation Methodology .....	10-10
Computer Modeling Tools Supporting the Restudy .....	10-11
Water Budget Comparisons Between the 1995 Base, 2050 Base, and the Initial Draft Plan ...	10-12
Cost Figures for Planning and Initial Draft Plan .....	10-16
Linkages Between the Restudy and the ECP .....	10-16
Findings on the Comprehensive C&SF Restudy .....	10-18
<b>Chapter 11: The Everglades Stormwater Program</b>	<b>11-1</b>
Summary .....	11-1
Introduction .....	11-1
Strategies for Structures Discharging Within and From the EPA .....	11-3
Conclusions .....	11-10
Findings on the Everglades Stormwater Program .....	11-11
<b>Chapter 12: Integrated Strategy to Achieve Water Quality Goals By 2006</b>	<b>12-1</b>
Summary .....	12-1
Long-Term Phosphorus Criterion for the Everglades .....	12-2
Water Quality Standards Other than Phosphorus .....	12-3
Everglades Agricultural Area - Best Management Practices .....	12-4

The Everglades Construction Project..... 12-4  
STA Optimization ..... 12-5  
Evaluation of Potential Supplemental Technologies ..... 12-5  
Other Ongoing Planning Activities..... 12-6  
Everglades Stormwater Program..... 12-7  
Funding for Phase 2 ..... 12-8  
Integrated Strategy to Achieve Phase 2 Goals ..... 12-8  
Risks Associated with Premature Selection of Phase 2 Solutions ..... 12-11  
Conclusions ..... 12-12  
Findings on an Integrated Plan to Achieve Water Quality Goals ..... 12-13  
Literature Cited ..... 12-14
